Human Resource Manager

TreeLeaf.ai

Sankhamul, Kathmandu

Respected Sir/Madam,

I would like to apply for Python Django Developer position in your company. I have uploaded my CV that gives the prospect of my past qualifications.

I recently graduated as a Bachelor's student from Herald College Kathmandu in BSc (Hons) Computer Science. I believe my course and the position published by your company falls in similar areas and I will present my dedication and passion with full determination and my skills and capability will definitely benefit your organization.

Personally, I am hardworking and adaptive; possessing a self-driven "can do" attitude to improve my skills through experiences and learning with others whilst sharing my ideas. I have also worked on an e-commerce project (shoptonicnepal.com) using python programming language with Django framework.

I wish to work in an organization like yours where I can apply my theoretical knowledge into strengthening my experience.

I would like to thank you for your consideration and hope to hear from you soon.

Sincerely,

Sabbir Shahi
